CAREER OBJECTIVE

I am a highly competent data warehouse software developer with 6-year experience developing a wide range of data warehouse/ETL/SQL solutions. But from all my experience in Computer Science I have understood that area which I would like the most is web development. That is why I am currently looking for a job as a web developer and meanwhile building my skills related to web development were I already have solid HTML, CSS and JavaScript knowledge.

WORK EXPERIENCE

ETL developer\Programmer
Emergn

December 2014 - current   Riga, Latvia - work remotely

Working with Latvian State revenue department data warehouse Agile/Kanban team. Main responsibility is implementing ETL solutions in an existing data warehouse using SAP BODS, IBM DataStage and Pentaho ETL tools. As a result, additional skills like ODBC, JDBC connections and SQL in different database systems(MS SQL, Informix, Sybase,Oracle, Netezza) were adapted.
Other projects include:
SAP HANA,
Jira/Git/GitHub version control,
Web development (HTML, CSS, JavaScript),
Java SE(clients),
System analytics,
Code supervision,
Web Services(SOAP, REST)
Scripting languages.

PROJECTS

Projects currently in my portfolio website:

- 6 HTML\CSS Responsive websites
- 1 Website with frontend for different JavaScript tasks: palindrom checker, number to roman numeral converter, cash register etc.
- 3 ReactJS projects: random quote generator, markdown previewer, my portfolio website
